

Neumann University Program Assessment Plan

Division: Nursing and Health Sciences

Division : Nursing and Health Sciences	
Undergraduate Major: BS in Nursing Program Learning Outcomes:	
<ol style="list-style-type: none"> 1. Synthesize theories and concepts from the humanities and fine arts, and the physical, behavioral, social, and nursing sciences as a foundation for practice. 2. Ensure provision of holistic, compassionate nursing care in all settings with individuals from diverse backgrounds across the lifespan. 3. Integrate evidence-based knowledge and clinical reasoning in the delivery of safe, effective, and efficient nursing care. 4. Integrate information systems and health technologies in the provision of nursing care. 5. Examine the implications of health policy on issues of access, equity, affordability, and social justice in health care delivery. 6. Implement leadership strategies to promote quality health care delivery through communication, collaboration, coordination, and consultation with individuals, families, communities, and members of the interdisciplinary team. 7. Incorporate health promotion and disease and/or injury prevention when caring for individuals, families, communities, and populations across the health care continuum. 8. Assume personal responsibility for excellence in practice, lifelong learning, and professional growth and development. 9. Integrate the Nursing Code of Ethics and Franciscan values (reverence, integrity, service, excellence, and stewardship) in professional practice.
